A PRACTICAL GUIDE TO IMPROVING SUPPLY CHAIN OPERATIONS WITH RFID

Written by the Director of the Center for Excellence in Supply Chain Management at Baylor University, *RFID in the Supply Chain* offers expert insight to help you decide whether, when, and how to use RFID technology to improve supply chain management processes.

This informative volume provides a technological overview of RFID and explains the three architecture layers of the Electronic Product Code (EPC) global standards: identify, capture, and exchange. Building consensus for RFID adoption as well as security and privacy concerns are discussed. Real-world case studies illustrate the broad range of RFID applications across industries. A summary of RFID benefits and a look ahead at future implementations conclude this detailed resource.

Coverage includes:

- Technical overview of RFID technology basics and systems components
- Advantages and limitations of RFID
- EPC global industry standards
- Operational, technical, and financial challenges in designing RFID applications
- RFID security and privacy concerns and solutions
- Business analytics and building the business case for RFID implementation
- Improved supply chain visibility
- Improved asset visibility and capital goods tracking
- Work-in-progress tracking--managing internal supply chains
- Library management systems
- Returnable asset tracking

Features 32 case studies of successful RFID implementation at:

Gillette * Charles Voge Group * Intermountain Healthcare * Walter Reed Army Medical Center * AeroScout * Erlangen University Hospital (Germany) * Royal Phillips Electronics * Pro-X Pharmaceuticals * Endware Defense Systems * National Library Board Singapore * Belgian University Library * Rewe Group * and many others

From reader reviews:

Joshua Rodrigue:

Within other case, little men and women like to read book RFID in the Supply Chain. You can choose the best book if you want reading a book. Given that we know about how is important a book RFID in the Supply Chain. You can add expertise and of course you can around the world by a book. Absolutely right, due to the fact from book you can realize everything! From your country right up until foreign or abroad you will be known. About simple point until wonderful thing it is possible to know that. In this era, we can easily open a book as well as searching by internet product. It is called e-book. You can utilize it when you feel bored stiff to go to the library. Let's read.

Roger Bennett:

As people who live in typically the modest era should be up-date about what going on or data even knowledge to make these keep up with the era which is always change and make progress. Some of you maybe will probably update themselves by examining books. It is a good choice for you personally but the problems coming to anyone is you don't know what one you should start with. This RFID in the Supply Chain is our recommendation to help you keep up with the world. Why, as this book serves what you want and wish in this era.

John Davis:

This RFID in the Supply Chain usually are reliable for you who want to be described as a successful person, why. The reason of this RFID in the Supply Chain can be on the list of great books you must have is actually giving you more than just simple studying food but feed you actually with information that might be will shock your before knowledge. This book is actually handy, you can bring it just about everywhere and whenever your conditions in the e-book and printed people. Beside that this RFID in the Supply Chain forcing you to have an enormous of experience for instance rich vocabulary, giving you demo of critical thinking that could it useful in your day action. So , let's have it and enjoy reading.

Julie Berkey:

As a student exactly feel bored to help reading. If their teacher requested them to go to the library or make summary for some publication, they are complained. Just very little students that has reading's internal or real their leisure activity. They just do what the educator want, like asked to go to the library. They go to right now there but nothing reading seriously. Any students feel that looking at is not important, boring and can't see colorful photos on there. Yeah, it is to become complicated. Book is very important for you personally. As we know that on this period of time, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. So , this RFID in the Supply Chain can make you feel more interested to read.
