Type-2 Fuzzy Graphical Models for Pattern Recognition (Studies in Computational Intelligence)

Jia Zeng, Zhi-Qiang Liu

Type-2 Fuzzy Graphical Models for Pattern Recognition (Studies in Computational Intelligence)

Jia Zeng, Zhi-Qiang Liu

Type-2 Fuzzy Graphical Models for Pattern Recognition (Studies in Computational Intelligence) Jia Zeng, Zhi-Qiang Liu

This book discusses how to combine type-2 fuzzy sets and graphical models to solve a range of real-world pattern recognition problems such as speech recognition, handwritten Chinese character recognition, topic modeling as well as human action recognition. It covers these recent developments while also providing a comprehensive introduction to the fields of type-2 fuzzy sets and graphical models. Though primarily intended for graduate students, researchers and practitioners in fuzzy logic and pattern recognition, the book can also serve as a valuable reference work for researchers without any previous knowledge of these fields. Dr. Jia Zeng is a Professor at the School of Computer Science and Technology, Soochow University, China. Dr. Zhi-Qiang Liu is a Professor at the School of Creative Media, City University of Hong Kong, China.

From reader reviews:

Gary Lopez:

In this 21st one hundred year, people become competitive in every way. By being competitive today, people have do something to make these individuals survives, being in the middle of the actual crowded place and notice simply by surrounding. One thing that at times many people have underestimated this for a while is reading. Yep, by reading a publication your ability to survive boost then having chance to remain than other is high. For you personally who want to start reading any book, we give you that Type-2 Fuzzy Graphical Models for Pattern Recognition (Studies in Computational Intelligence) book as basic and daily reading reserve. Why, because this book is usually more than just a book.

Carol Pyles:

The book Type-2 Fuzzy Graphical Models for Pattern Recognition (Studies in Computational Intelligence) will bring one to the new experience of reading the book. The author style to describe the idea is very unique. Should you try to find new book to learn, this book very appropriate to you. The book Type-2 Fuzzy Graphical Models for Pattern Recognition (Studies in Computational Intelligence) is much recommended to you to study. You can also get the e-book in the official web site, so you can easier to read the book.

Shawn McDonald:

This Type-2 Fuzzy Graphical Models for Pattern Recognition (Studies in Computational Intelligence) is fresh way for you who has interest to look for some information as it relief your hunger details. Getting deeper you in it getting knowledge more you know otherwise you who still having bit of digest in reading this Type-2 Fuzzy Graphical Models for Pattern Recognition (Studies in Computational Intelligence) can be the light food for yourself because the information inside this kind of book is easy to get by anyone. These books create itself in the form that is certainly reachable by anyone, yes I mean in the e-book application form. People who think that in publication form make them feel tired even dizzy this reserve is the answer. So there is no in reading a book especially this one. You can find actually looking for. It should be here for anyone. So , don't miss the idea! Just read this e-book type for your better life along with knowledge.

George Eichner:

Some people said that they feel fed up when they reading a e-book. They are directly felt the idea when they get a half areas of the book. You can choose the actual book Type-2 Fuzzy Graphical Models for Pattern Recognition (Studies in Computational Intelligence) to make your current reading is interesting. Your personal skill of reading ability is developing when you just like reading. Try to choose simple book to make you enjoy to see it and mingle the opinion about book and reading through especially. It is to be very first opinion for you to like to wide open a book and read it. Beside that the e-book Type-2 Fuzzy Graphical Models for Pattern Recognition (Studies in Computational Intelligence) can to be your friend when you're truly feel alone and confuse using what must you're doing of these time.
