Rife Machines are spreading throughout the world and is a topic of interest that is growing fast. Most of the time, those who own such an electronic device, do not know how to use it to its full potential. This is especially true regarding how many frequency sets exist today and what frequencies can be used as a potential solution for a particular problem. With many Rife devices, they come with software that has preloaded frequency sets. Others rely on information that you can get from other sources – even online from the web. However, this information is typically listed in alphabetical order. This makes it extremely difficult to identify all possibilities or alternative sets that one may wish to use in their experiments for any given condition. In this guide, for the first time, you will find all the frequency sets used on a Rife Machine – both known and experimental. They are arranged accordingly to a set of criteria and relevance making cross reference searches possible. More than 6200 frequency sets are listed (127 pages, full color). They cover the human body organs, pathogens, diseases, homeopathic products, minerals, vitamins, chakras, and more. They are sorted and catalogued in a way that makes it much easier to locate the information that will allow the best program choices. Each entry in the guide (Subject or Argument) is also followed by 'Author of the set of frequencies (eg. Rife, Hulda Clark, CALF, etc.), or by explanatory Notes, by the set of Frequencies in Hz, the Organ concerned, the possible causative Condition of a state or a situation and the recommended time of exposure (in Seconds). Through the use of this guide, you can easily discover all possible frequency sets that are related to the subject of interest. Also in ebook version. Happy Rifing!
