The Kluwer International Series in Engineering and Computer Science; 23 (The Springer International Series in Engineering and Computer Science) Robert J. McEliece

This book developed from a course on finite fields I gave at the University of Illinois at Urbana-Champaign in the Spring semester of 1979. The course was taught at the request of an exceptional group of graduate students (including Anselm Blumer, Fred Garber, Evaggelos Geraniotis, Jim Lehnert, Wayne Stark, and Mark Wallace) who had just taken a course on coding theory from me. The theory of finite fields is the mathematical foundation of algebraic coding theory, but in coding theory courses there is never much time to give more than a "Volkswagen" treatment of them. But my 1979 students wanted a "Cadillac" treatment, and this book differs very little from the course I gave in response. Since 1979 I have used a subset of my course notes (corresponding roughly to Chapters 1-6) as the text for my "Volkswagen" treatment of finite fields whenever I teach coding theory. There is, ironically, no coding theory anywhere in the book! If this book had a longer title it would be "Finite fields, mostly of characteristic 2, for engineering and computer science applications." It certainly does not pretend to cover the general theory of finite fields in the profound depth that the recent book of Lidl and Neiderreiter (see the Bibliography) does.

From reader reviews:

Brad Bennett:

What do you concentrate on book? It is just for students because they're still students or this for all people in the world, the particular best subject for that? Just simply you can be answered for that concern above. Every person has different personality and hobby for every single other. Don't to be forced someone or something that they don't desire do that. You must know how great as well as important the book The Kluwer International Series in Engineering and Computer Science; 23 (The Springer International Series in Engineering and Computer Science). All type of book is it possible to see on many solutions. You can look for the internet sources or other social media.

Joyce Williams:

Is it anyone who having spare time and then spend it whole day by means of watching television programs or just telling lies on the bed? Do you need something totally new? This The Kluwer International Series in Engineering and Computer Science; 23 (The Springer International Series in Engineering and Computer Science) can be the reply, oh how comes? A fresh book you know. You are so out of date, spending your free time by reading in this brand new era is common not a geek activity. So what these ebooks have than the others?

Henry Stehle:

In this particular era which is the greater man or who has ability to do something more are more special than other. Do you want to become certainly one of it? It is just simple strategy to have that. What you should do is just spending your time very little but quite enough to experience a look at some books. One of several books in the top record in your reading list will be The Kluwer International Series in Engineering and Computer Science; 23 (The Springer International Series in Engineering and Computer Science). This book which can be qualified as The Hungry Hills can get you closer in turning out to be precious person. By looking up and review this e-book you can get many advantages.

Brian Hill:

You will get this The Kluwer International Series in Engineering and Computer Science; 23 (The Springer International Series in Engineering and Computer Science) by go to the bookstore or Mall. Simply viewing or reviewing it can to be your solve trouble if you get difficulties for ones knowledge. Kinds of this e-book are various. Not only by simply written or printed and also can you enjoy this book by means of e-book. In the modern era like now, you just looking by your mobile phone and searching what your problem. Right now, choose your own ways to get more information about your e-book. It is most important to arrange yourself to make your knowledge are still up-date. Let's try to choose suitable ways for you.
