NurtureShock: New Thinking About Children

Po Bronson, Ashley Merryman

NurtureShock: New Thinking About Children Po Bronson, Ashley Merryman

One of the most influential books about children ever published, *Nurture Shock* offers a revolutionary new perspective on children that upends a library's worth of conventional wisdom. With impeccable storytelling and razor-sharp analysis, the authors demonstrate that many of modern society's strategies for nurturing children are in fact backfiring--because key twists in the science have been overlooked. Nothing like a parenting manual, NurtureShock gets to the core of how we grow, learn and live.

Released in hardcover in September 2009, *Nurture Shock* remained on the New York Times best seller list for three months, and was one of Amazon's best selling books for 2009. The book has become a worldwide phenomenon with editions published around the world - in fifteen languages, to date.

In addition to Bronson and Merryman's writings on praise -- first made famous in *New York* magazine -- there are nine more equally groundbreaking chapters. Among the topics covered:

Why the most brutal person in a child's life is often a sibling, and how a single aspect of their preschool-aged play can determine their relationship as adults.

When is it too soon - or too late - to teach a child about race? Children in diverse schools are less likely to have a cross-racial friendship, not more - so is school diversity backfiring?

Millions of families are fighting to get their kids into private schools and advanced programs as early as possible. But schools are missing the best kids, 73% of the time - the new neuroscience explains why.

Why are kids - even those from the best of homes - still aggressive and cruel? The answer is found in a rethinking of parental conflict, discipline, television's unexpected influence, and social dominance.

Parents are desperate to jump-start infants' language skills. Recently, scientists have discovered a series of natural techniques that are astonishing in their efficacy - it's not baby videos, sign language, or even the richness of language exposure. It's nothing you've heard before.
