Pulsars were initially unknown until about the late sixties using radio telescopes where these rotating neutron stars may create a swath of electromagnetic radiation across the Earth. This analogous lighthouse sweeping signal is accurate, repeatable, have a periodic response better than an atomic clock and obviously represents an unusual cosmic endeavor. What caused a neutron star within a Pulsar? What about unusual celestial trajectories? Does the rotation of a spinning neutron star actually alter gravity? This book questions the conventional wisdom about Pulsars and neutron stars offering a different approach to resolve some of these challenges. Although some mathematics are involved, these rationales point to inferences in contrast to our conventional perceptions. A new awakening! We crave to unravel this cosmic mystery!
