Adaptive Beaming and Imaging in the Turbulent Atmosphere (SPIE Press Monograph Vol. PM109)

Vladimir P. Lukin, Boris V. Fortes

Due to the wide application of adaptive optical systems, an understanding of optical wave propagation in randomly inhomogeneous media has become essential, and several numerical models of individual AOS components and of efficient correction algorithms have been developed. This monograph contains detailed descriptions of the mathematical experiments that were designed and carried out during more than a decade's worth of research.

Contents

- Preface to the English edition
- Introduction
- Mathematical Simulation of Laser Beam Propagation in the Atmosphere
- Modeling an Adaptive Optics System
- Adaptive Imaging
- Minimization and Phase Correction of Thermal Blooming of High-Power Beams
- A Reference Beacon as a Key Element of an Adaptive Optics System
- Conclusion
- Index

From reader reviews:

Tatum Martin:

The feeling that you get from Adaptive Beaming and Imaging in the Turbulent Atmosphere (SPIE Press Monograph Vol. PM109) is the more deep you digging the information that hide inside words the more you get enthusiastic about reading it. It doesn't mean that this book is hard to recognise but Adaptive Beaming and Imaging in the Turbulent Atmosphere (SPIE Press Monograph Vol. PM109) giving you excitement feeling of reading. The author conveys their point in selected way that can be understood through anyone who read that because the author of this book is well-known enough. This specific book also makes your vocabulary increase well. Therefore it is easy to understand then can go along with you, both in printed or e-book style are available. We propose you for having that Adaptive Beaming and Imaging in the Turbulent Atmosphere (SPIE Press Monograph Vol. PM109) instantly.

Amanda Despain:

The guide untitled Adaptive Beaming and Imaging in the Turbulent Atmosphere (SPIE Press Monograph Vol. PM109) is the publication that recommended to you to see. You can see the quality of the reserve content that will be shown to you. The language that creator use to explained their ideas are easily to understand. The writer was did a lot of exploration when write the book, therefore the information that they share to you personally is absolutely accurate. You also can get the e-book of Adaptive Beaming and Imaging in the Turbulent Atmosphere (SPIE Press Monograph Vol. PM109) from the publisher to make you far more enjoy free time.

Frances Barrett:

In this period of time globalization it is important to someone to get information. The information will make you to definitely understand the condition of the world. The health of the world makes the information much easier to share. You can find a lot of sources to get information example: internet, newspapers, book, and soon. You can view that now, a lot of publisher which print many kinds of book. Often the book that recommended to you is Adaptive Beaming and Imaging in the Turbulent Atmosphere (SPIE Press Monograph Vol. PM109) this reserve consist a lot of the information in the condition of this world now. This particular book was represented how do the world has grown up. The words styles that writer value to explain it is easy to understand. Typically the writer made some study when he makes this book. This is why this book appropriate all of you.

Jacob Florence:

Don't be worry when you are afraid that this book can filled the space in your house, you could have it in e-book method, more simple and reachable. This particular Adaptive Beaming and Imaging in the Turbulent Atmosphere (SPIE Press Monograph Vol. PM109) can give you a lot of friends because by you checking out this one book you have factor that they don't and make anyone more like an interesting person. This kind of

book can be one of a step for you to get success. This publication offer you information that probably your friend doesn't realize, by knowing more than different make you to be great folks. So , why hesitate? Let us have Adaptive Beaming and Imaging in the Turbulent Atmosphere (SPIE Press Monograph Vol. PM109).
