Spark: Big Data Cluster Computing in Production Ilya Ganelin, Ema Orhian, Kai Sasaki, Brennon York
Production-targeted Spark guidance with real-world use cases

Spark: Big Data Cluster Computing in Production goes beyond general Spark overviews to provide targeted guidance toward using lightning-fast big-data clustering in production. Written by an expert team well-known in the big data community, this book walks you through the challenges in moving from proof-of-concept or demo Spark applications to live Spark in production. Real use cases provide deep insight into common problems, limitations, challenges, and opportunities, while expert tips and tricks help you get the most out of Spark performance. Coverage includes Spark SQL, Tachyon, Kerberos, ML Lib, YARN, and Mesos, with clear, actionable guidance on resource scheduling, db connectors, streaming, security, and much more.

Spark has become the tool of choice for many Big Data problems, with more active contributors than any other Apache Software project. General introductory books abound, but this book is the first to provide deep insight and real-world advice on using Spark in production. Specific guidance, expert tips, and invaluable foresight make this guide an incredibly useful resource for real production settings.

- Review Spark hardware requirements and estimate cluster size
- Gain insight from real-world production use cases
- Tighten security, schedule resources, and fine-tune performance
- Overcome common problems encountered using Spark in production

Spark works with other big data tools including MapReduce and Hadoop, and uses languages you already know like Java, Scala, Python, and R. Lightning speed makes Spark too good to pass up, but understanding limitations and challenges in advance goes a long way toward easing actual production implementation.

Spark: Big Data Cluster Computing in Production tells you everything you need to know, with real-world production insight and expert guidance, tips, and tricks.

From reader reviews:

Walter Johnson:

What do you think about book? It is just for students because they are still students or that for all people in the world, what best subject for that? Just you can be answered for that problem above. Every person has diverse personality and hobby for every other. Don't to be pressured someone or something that they don't want do that. You must know how great in addition to important the book Spark: Big Data Cluster Computing in Production. All type of book can you see on many resources. You can look for the internet sources or other social media.

Gustavo Cyr:

Often the book Spark: Big Data Cluster Computing in Production will bring you to definitely the new experience of reading the book. The author style to describe the idea is very unique. Should you try to find new book to see, this book very suited to you. The book Spark: Big Data Cluster Computing in Production is much recommended to you to see. You can also get the e-book in the official web site, so you can more easily to read the book.

Kate Sutton:

On this era which is the greater man or who has ability in doing something more are more treasured than other. Do you want to become certainly one of it? It is just simple strategy to have that. What you should do is just spending your time not very much but quite enough to get a look at some books. One of many books in the top collection in your reading list is Spark: Big Data Cluster Computing in Production. This book that is qualified as The Hungry Hills can get you closer in turning into precious person. By looking upward and review this book you can get many advantages.

James Mace:

Some individuals said that they feel bored when they reading a e-book. They are directly felt that when they get a half regions of the book. You can choose the actual book Spark: Big Data Cluster Computing in Production to make your personal reading is interesting. Your current skill of reading proficiency is developing when you such as reading. Try to choose easy book to make you enjoy you just read it and mingle the sensation about book and studying especially. It is to be initially opinion for you to like to open a book and study it. Beside that the reserve Spark: Big Data Cluster Computing in Production can to be a newly purchased friend when you're really feel alone and confuse in doing what must you're doing of their time.
