Cosmic Catastrophes: Exploding Stars, Black Holes, and Mapping the Universe

J. Craig Wheeler

Cosmic Catastrophes: Exploding Stars, Black Holes, and Mapping the Universe J. Craig Wheeler

From supernovae and gamma-ray bursts to the accelerating Universe, this is an exploration of the intellectual threads that lead to some of the most exciting ideas in modern astrophysics and cosmology. This fully updated second edition incorporates new material on binary stars, black holes, gamma-ray bursts, worm-holes, quantum gravity and string theory. It covers the origins of stars and their evolution, the mechanisms responsible for supernovae, and their progeny, neutron stars and black holes. It examines the theoretical ideas behind black holes and their manifestation in observational astronomy and presents neutron stars in all their variety known today. This book also covers the physics of the twentieth century, discussing quantum theory and Einstein's gravity, how these two theories collide, and the prospects for their reconciliation in the twenty-first century. This will be essential reading for undergraduate students in astronomy and astrophysics, and an excellent, accessible introduction for a wider audience.

From reader reviews:

France Brown:

Book is usually written, printed, or created for everything. You can learn everything you want by a reserve. Book has a different type. As we know that book is important matter to bring us around the world. Close to that you can your reading proficiency was fluently. A guide Cosmic Catastrophes: Exploding Stars, Black Holes, and Mapping the Universe will make you to become smarter. You can feel much more confidence if you can know about everything. But some of you think that open or reading some sort of book make you bored. It isn't make you fun. Why they can be thought like that? Have you seeking best book or suitable book with you?

Ignacio Lewis:

The ability that you get from Cosmic Catastrophes: Exploding Stars, Black Holes, and Mapping the Universe will be the more deep you rooting the information that hide into the words the more you get enthusiastic about reading it. It does not mean that this book is hard to understand but Cosmic Catastrophes: Exploding Stars, Black Holes, and Mapping the Universe giving you buzz feeling of reading. The copy writer conveys their point in selected way that can be understood simply by anyone who read that because the author of this e-book is well-known enough. This particular book also makes your vocabulary increase well. It is therefore easy to understand then can go along with you, both in printed or e-book style are available. We suggest you for having this kind of Cosmic Catastrophes: Exploding Stars, Black Holes, and Mapping the Universe instantly.

Diane Wilson:

The book untitled Cosmic Catastrophes: Exploding Stars, Black Holes, and Mapping the Universe is the e-book that recommended to you to study. You can see the quality of the publication content that will be shown to anyone. The language that writer use to explained their ideas are easily to understand. The copy writer was did a lot of study when write the book, to ensure the information that they share for your requirements is absolutely accurate. You also could get the e-book of Cosmic Catastrophes: Exploding Stars, Black Holes, and Mapping the Universe from the publisher to make you far more enjoy free time.

Harvey Lee:

What is your hobby? Have you heard which question when you got college students? We believe that that concern was given by teacher to the students. Many kinds of hobby, All people has different hobby. So you know that little person such as reading or as reading become their hobby. You need to know that reading is very important and also book as to be the thing. Book is important thing to increase you knowledge, except your own teacher or lecturer. You see good news or update about something by book. Many kinds of books that can you go onto be your object. One of them is Cosmic Catastrophes: Exploding Stars, Black Holes, and Mapping the Universe.
