Major themes of this textbook: Homeostasis, exercise, pathophysiology, and cellular and molecular mechanisms of body function, are reflected in the cover of the 12th ed. Research in these areas continues at a fast pace, and we tried to reflect the excitement that this brings to the field of human physiology in the revised text. We have added new material on our modern understanding and treatment of many diseases and have made special note wherever appropriate of recent molecular advances in human physiology. we have expanded two new pedagogical elements , we have added dozens of new Physiological Inquiries doubling total number of these valuable concept checks; Users of the book will also benefit from the extensive coverage of exercise physiology. The Index is organized according to disease; infectious or causative agents; and the treatments, diagnostics and therapeutic drugs used too treat disease.
